# About us

**For over 40 years, Herbinn Morocco has embodied a passion passed down from father to son. Built on ancestral expertise, the company was founded with a vision: to highlight the natural treasures of Morocco through exceptional aromatic and medicinal plants. Each generation has enriched this family tradition by contributing its knowledge and dedication, making Herbinn Morocco a true leader in its field.**

Our commitment begins on our own farms, where we carefully cultivate and harvest the plants that form the heart of our products. By controlling every step, from harvesting to processing, we ensure impeccable quality and authentic products. This direct connection to Moroccan nature allows us to preserve the unique properties of each plant while adhering to the highest standards.

Certified by the most demanding food safety labels, Herbinn Morocco has recently obtained the FSSC 22000 version 6 certification. This achievement highlights our dedication to quality and product safety. By combining tradition, innovation, and excellence, we remain committed to our mission: to share the very best of Moroccan nature with the world.

[WWW.HERBINNMOROCCO.COM](http://WWW.HERBINNMOROCCO.COM)

A wide-angle photograph of a lush green field of aromatic and medicinal herbs, likely in Morocco. The field is densely packed with plants that have small, light-colored flowers. The horizon is flat, and the sky is a clear, pale blue. In the distance, some faint structures and a utility pole are visible. The overall scene is bright and natural.

*Aromatic and  
medicinal herbs*
